## Software Engineer (m/w/d)

**Arbeitgeber**  
Runge Pharma

### Mission

- Runge Pharma and its clients facilitate cross-border trading of needed medicines
- Live software engineering: build serious and slick software, run it, break it (sometimes)
- Work on software components
- Develop software with state-of-the-art tech stack with usual suspects
- Make software production ready and run it on our own secure infrastructure
- Find synergies, support your colleagues, learn from each other and build your team

**Veröffentlichungsdatum**  
8. August 2019

### Profile

- You are developer with all your heart, a Software Craft(wo)man or a Software Artist
- At least 2-5 years of experience in professional software development
- Be comfortable in at least two of the following languages: VB, C#, Javascript, Go, Java, Python, Scala, Haskell or Ruby
- You master SQL and No-SQL databases, such as MSSQL, MySQL, Postgres, MongoDB
- Having worked with Docker and ElasticSearch is a plus
- You are able to run what you build

### Our Offer

- Chose the weapon of your choice: Mac or PC / IDE
- Competitive salary (contract preferred)
- Above average vacation entitlement
- An opportunity to work in a very friendly and young team and shape the look and character of our in future
